

POHJANMAAN TEOLLISUUS

23–24 November 2022 | Botniahalli, VAASA

The air is charged with enthusiasm as this year the event Pohjanmaan Teollisuus is held in the energetic city of Vaasa. The two-day industry expert event offers excellent opportunities to network, recruit, and develop professional competence among the top experts in industry. As usual, the program consists of hot briefings and perceptive seminars on the latest industrial topics and future prospects.

The theme of the Pohjanmaan Teollisuus 2022 event is now more on topic than ever before. This year, we approach sustainable development from the energy point-of-view, which is perfect considering the event venue. This year we present for the first time the hottest issues in energy and electricity. The other exhibition themes include automation, robotics, and digitalization, 3D printing and software, industrial machinery and equipment, components and contract manufacturing, logistics and storage, sustainable services and solutions, product development and innovation, service and maintenance as well as research, training, and recruitment.

Charge your batteries at Pohjanmaan Teollisuus. Contact us now! The best spots are the first to go.
